Governor Gray Davis
State Capitol
Sacramento, CA 95814

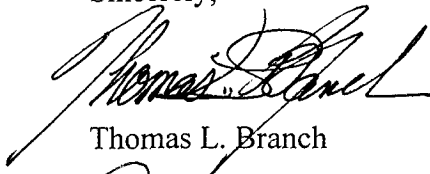

Dear Governor Davis;

We are writing you to ask your support of the CALFED Bay/Delta program – a plan to protect and use California's water resources for the next 50 years.

This plan invests in water efficiency before considering new dams and/or reservoirs. It restores our rivers, bays and fisheries. It improves water quality by enforcing pollution limits. Finally, it stops having the taxpayers pick up the tab for studies for new dams and reservoirs that flood valuable habitat and kill our rivers.

You play a key role in California's water future. You can lead California to a smarter future and away from the old ways of building massive dams, canals and reservoirs that harm our environment and reduce the quality of life....that benefit only developer and agribusiness interests. Please ensure that CALFED succeeds.

Sincerely,

Thomas L. Branch
